Flexible materials

- Banners, magnetic sheets
- Film and self-adhesive vinyls
- Flexographic plates (vertical cut)

Rigid materials (scoring)

- Cast acrylic or Plexiglas up to 3mm

THE SAFE, GENERAL PURPOSE CUTTING ALTERNATIVE TO USING A STRAIGHT EDGE AND HAND KNIFE

- High precision accuracy in a portable cutter
- Lightweight but robust design
- Versatile cutter for a wide range of materials
- Safety by design
- Reduces cutting time and reduces waste
- Simple and instinctive operation
- Calibrated for immediate 'out of the box' accuracy, keeps wastage to a minimum
- Guaranteed for 5 years

—• SIMPLICITY

Portable

Robust but lightweight, accurate and safe cutter that can be taken to your work.

The soft silicon cord on the underside of the cutter grips and protects materials and prevents movement during use.

Accurate

Guaranteed to cut within 1.0mm of a straight line for the whole length of the cutter.

Easy-to-use

Ergonomic 'rocker style' cutting head designed for left or right-handed use. The blade can be pulled or pushed as appropriate for the material being cut.

—• OPTION

Textile Cutter

Designed for cutting textiles and other delicate materials, or trimming thin strips off banners and posters, where a knife blade would be too aggressive.

To ensure safe operation the red blade guard is engaged when not in use.

Easy to adapt on the cutting head tool

—• SAFETY

Safety by design

The Simplex overcomes the safety hazards of using other portable methods of cutting, such as a hand knife and straight edge. The blade holder comes with automatic blade retraction for safety.
